Manay Garg

(+91) 9821334081 | manavgarg026@gmail.com | linkedin.com/in/manavgarg026 | https://github.com/Manav446

Summary:

Highly analytical, meticulously organized software developer skilled in software development, AI, and Data Science. Known for collaborative teamwork, a strong sense of ownership, and a proven history of delivering top-tier strategic solutions to overcome obstacles and drive business advancement.

Technical Skills:

- Programming Languages: Python, Java
- Frameworks & Tools: TensorFlow, PyTorch, Langchain, LlamaIndex, Flask, Spring Boot, Spring MVC, Hibernate, Spring Batch, Microservices
- Generative Al Technologies: Open Source and paid LLM models (like Open Al, Google Gemini, Mistal, Llama2, Mistral etc.), RAG
- Databases: PostgreSQL, MySQL, Microsoft SQL Server, Mongo-DB, Oracle
- Vector Databases: Chroma DB, Pinecone, Weaviate
- **AI/ML Techniques:** NLP, Neural Network optimization, Deep Learning, Supervised and Un-Supervised Algorithms, fine-tuning with custom data, vector embedding
- Clouds and deployment tools: Docker, GIT, AWS (EC2 and Lambda)

Experience:

Software Engineer (SE): Tata Consultancy Services LTD | August 2021 – Present

- Proficiently managed programming for databases and projects using Java and Oracle.
- Applied multithreading in multiple backend batch jobs and also used JNDI for database connectivity and also
 optimized SQL queries increasing the process and workflow of product.
- By applying the above things, the product became more feasible and optimized and able to enhanced the speed up to 60-70%.

Projects:

Source Code Analysis Using Gen-Al

- Overview: Created a chatbot that provides the detail description of the source code of the passed repo URL.
- Technologies: Google Gemini API, Python, Flask, Chroma DB, Docker
- Outcome: Reduced the time in reading the project documentation.

Email Spam Detection Using NLP

- Overview: Created a NLP application which classified whether an email is SPAM or HAM.
- Technologies: Python, NLP, ANN, Flask, Google Drive, Docker
- Outcome: Has able to identity whether the email is SPAM or Not in deeper way.

Education:

- GGSIPU, New Delhi | Bachelor of Computer Applications | August 2016 May 2019
- NIIT, New Delhi | Advance Program in Full Stack Software Development | June 2019 Feb 2022
- Sastra Deemed to be University, Thanjavur | Master of Computer Applications | August 2022 May 2024

Certifications:

- Mastering Generative AI from INEURON
- Full Stack Data Science Masters from PW Skills
